

# Independent Travel

## The confidence to travel alone

### Overview

Our Certified Partners can now offer an award winning Independent Travel service to give their end users the confidence and security to use public transport and travel independently, using their own smartphone.

It allows families, care providers and institutions, such as schools, to view, in real time, the location of each individual on the Archangel Platform, and in the case of an emergency the individual has the ability to raise an SOS alarm if they need assistance.

The Freedom App features an advanced fall detection sensor, advanced location services and intelligent reporting tools to monitor the safety of individuals while they travel.

### Benefits for your end users

**Increased Self Confidence** - Using the Freedom app in conjunction with the Archangel platform leads to increased self-confidence and an enhanced level of independence for individuals whenever they use bus, rail and other public transport solutions.

**Cost Saving** - With local authorities under constant pressure to reduce costs and an identifiable trend for increasing 'private hire' travel costs for individuals, the combination of the app and platform can deliver significant savings through the use of public transport.

**Safety and Reassurance** - The Freedom App features emergency assistance technology, enabling individuals to access the care they need in an emergency, 24/7/365.

**Peace of Mind** - Carers can view the location and wellbeing of an individual in the archangel platform.

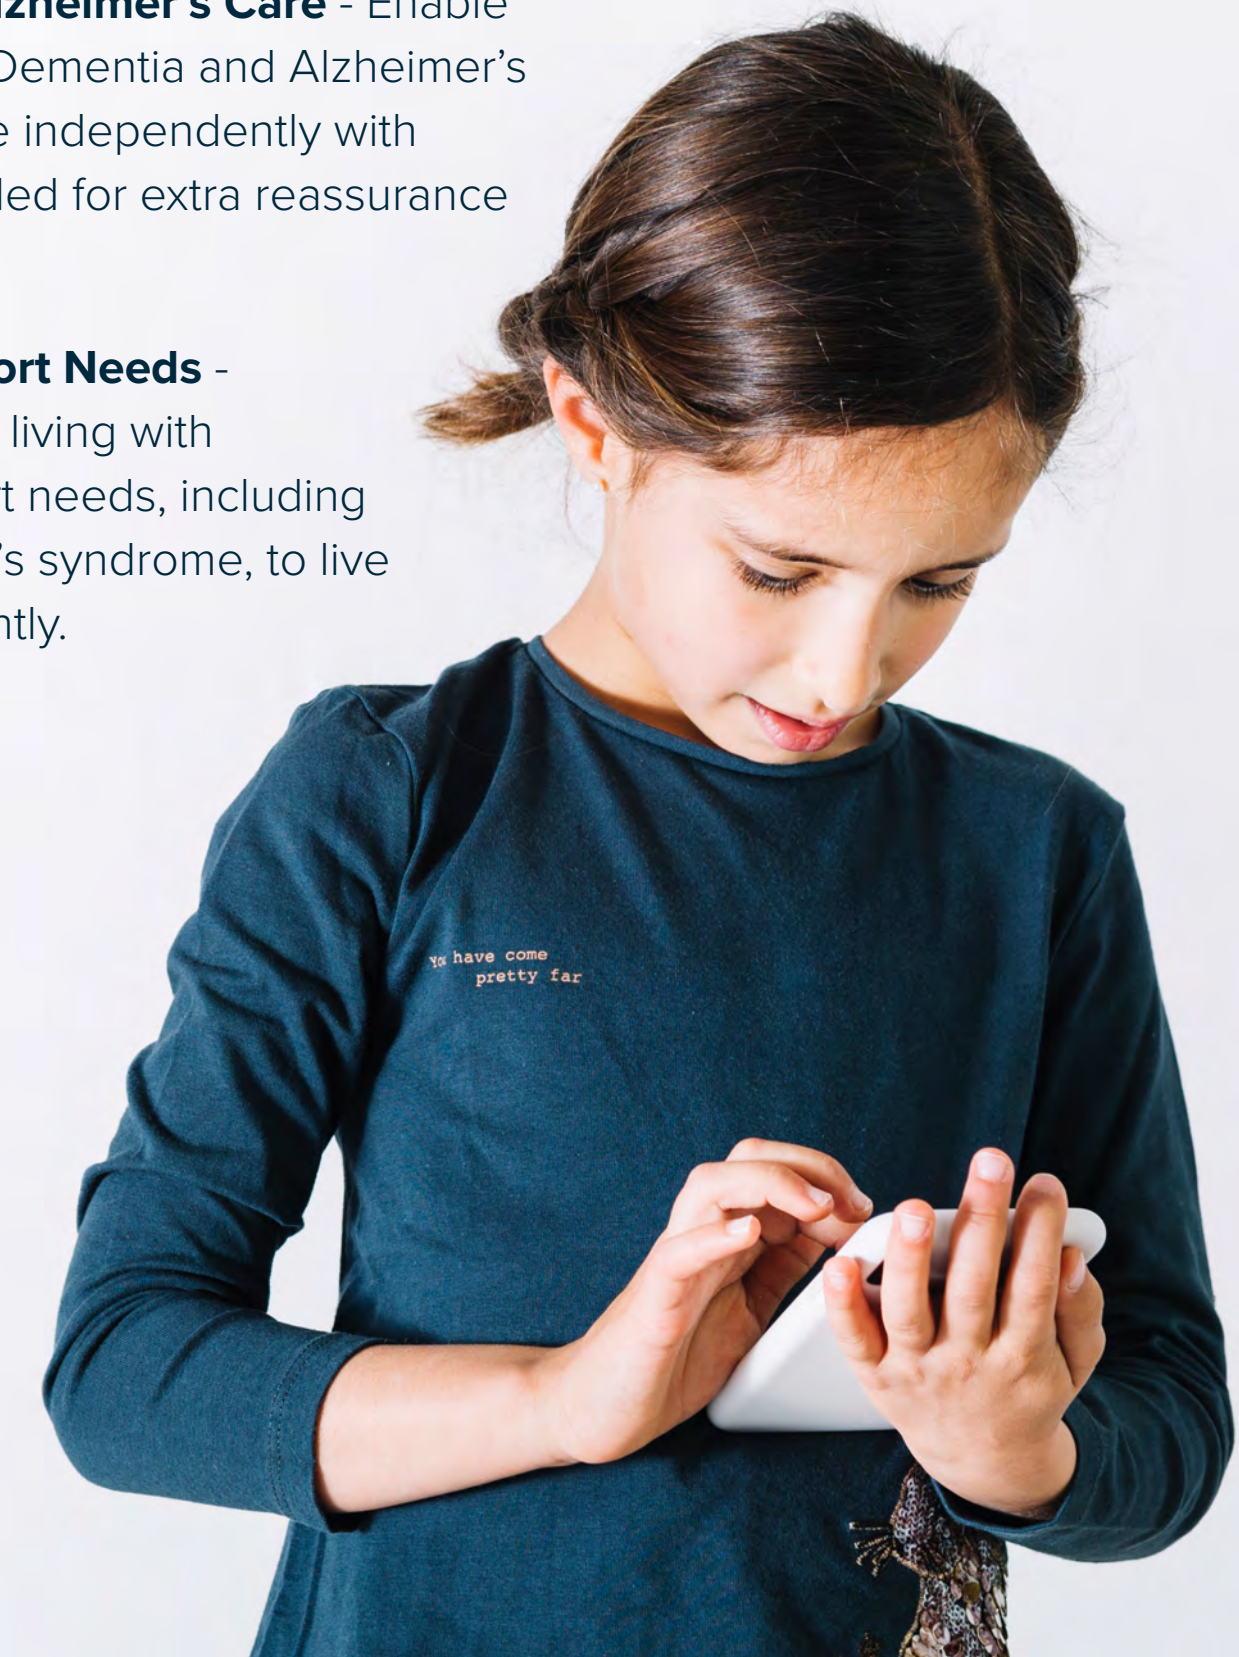

**Wider Achievement Programme** - Schools who support pupils with additional support needs (ASN) can integrate Independent Travel within their curriculum.

### Who is it for?

**Supporting Independence** - The service allows individuals who live alone to go outside safely. This reduces social isolation, loneliness and increases physical activity.

**Dementia and Alzheimer's Care** - Enable those living with Dementia and Alzheimer's to continue to live independently with geofencing enabled for extra reassurance and safety.

**Additional Support Needs** - Supporting those living with additional support needs, including autism and down's syndrome, to live more independently.

## Specifications

### Equipment

Partners can utilise our Freedom App, which loads onto any smartphone, and pairs this with our Archangel Platform to allow their end users to travel safely and independently.

### Features

**Integrated SOS Button** - Using our key-lock override technology, the Freedom app transforms your lock button into an SOS assist button and connects you via a two-way and recorded voice link, to first-responders or to live operators within a monitoring service.

**Fall Detection** - The 'Sensor' fall-detection feature, has three highly configurable functions which measure tilt, impact, and non-motion. The app will activate using one or more of these sensor functions and raise an alert to a first responder or monitoring service.

**Advanced Location Monitoring** - Utilising wi-fi and GPS technology accurately locate individuals to within a few metres in an emergency and secure mapping and reporting tools can be used to analyse individual history to assess routines and social inclusion.

**Geo-Fencing** - Sometimes it's important to identify areas of special risk or hazards, to know where citizens are, or establish if they arrived safe and on-time. Our Geo-Fencing feature permits the scheduling of real-time alerts to confirm when an individual leaves and enters a defined safety zone.

### Case Study

Here is a recent case study involving pupils, teachers and parents at **Sanderson High School**, an ASN educational establishment in East Kilbride. The scheme delivered a 50% uptick in confidence levels and led to a dedicated qualification as well as being shortlisted for a major Scottish national digital health award.

**50%** increase in pupils travelling independently

Delivering Independent Travel, Sanderson High School saw a 50% increase in the number of alumni who are now able to travel on public transport rather than private hire.
